

Beginners Aquaponics Course

TAFE Lecturer: Mr Tony Bart | 295 Warton Road | Canning Vale

2 hour Introduction to Aquaponics | Includes light refreshments

WHAT IS AQUAPONICS?

Aquaponics is the method of combining aquaculture and hydroponics to grow both fish and vegetables in a recirculating environment.

With more emphasis being placed on sustainable practices, aquaponics is a great way of producing healthy food with significantly less water usage and without the need for artificial fertilisers.

WHEN AND WHERE?
